

Minute Media Assignment:

Noa Leshem

The project is deployed to Heroku server.

Basic URL: <https://minutemedia-noaleshem.herokuapp.com/>

1. Get matches by team -
/matches?team={teamName}
2. Get matches by team filtered by status -
/matches?team={teamName}&status={statusType}
3. Get matches by tournament -
/matches?tournament={tournamentName}
4. Get matches by tournament filtered by status -
/matches?tournament={tournamentName}&status={statusType}

For example: to get all played matches of Liverpool -

<https://minutemedia-noaleshem.herokuapp.com/matches?team=Liverpool&status=played>

Parameters:

teamName- name of teams same as in the csv file.

tournamentName- name of tournaments same as in the csv file.

statusType- can be 'upcoming' or 'played'.

To run locally:

- npm install
- npm start

Then go to URL: <https://localhost:5000> with the same endpoints described above (1-4).

To run the tests:

- npm test
